

As part of week 3, day 2 assignment, I updated the existing application to enable new use cases

1. The application on URL launch lands on the page below, where the user enters JIRA authentication details

JIRA Board Manager

Connect to JIRA and manage your boards

1. Authentication

 →

2. Select Board

 →

3. View Items

JIRA Configuration

JIRA Domain *

https://sarbajit1210.atlassian.net/

Email *

sarbajit.stcet@gmail.com

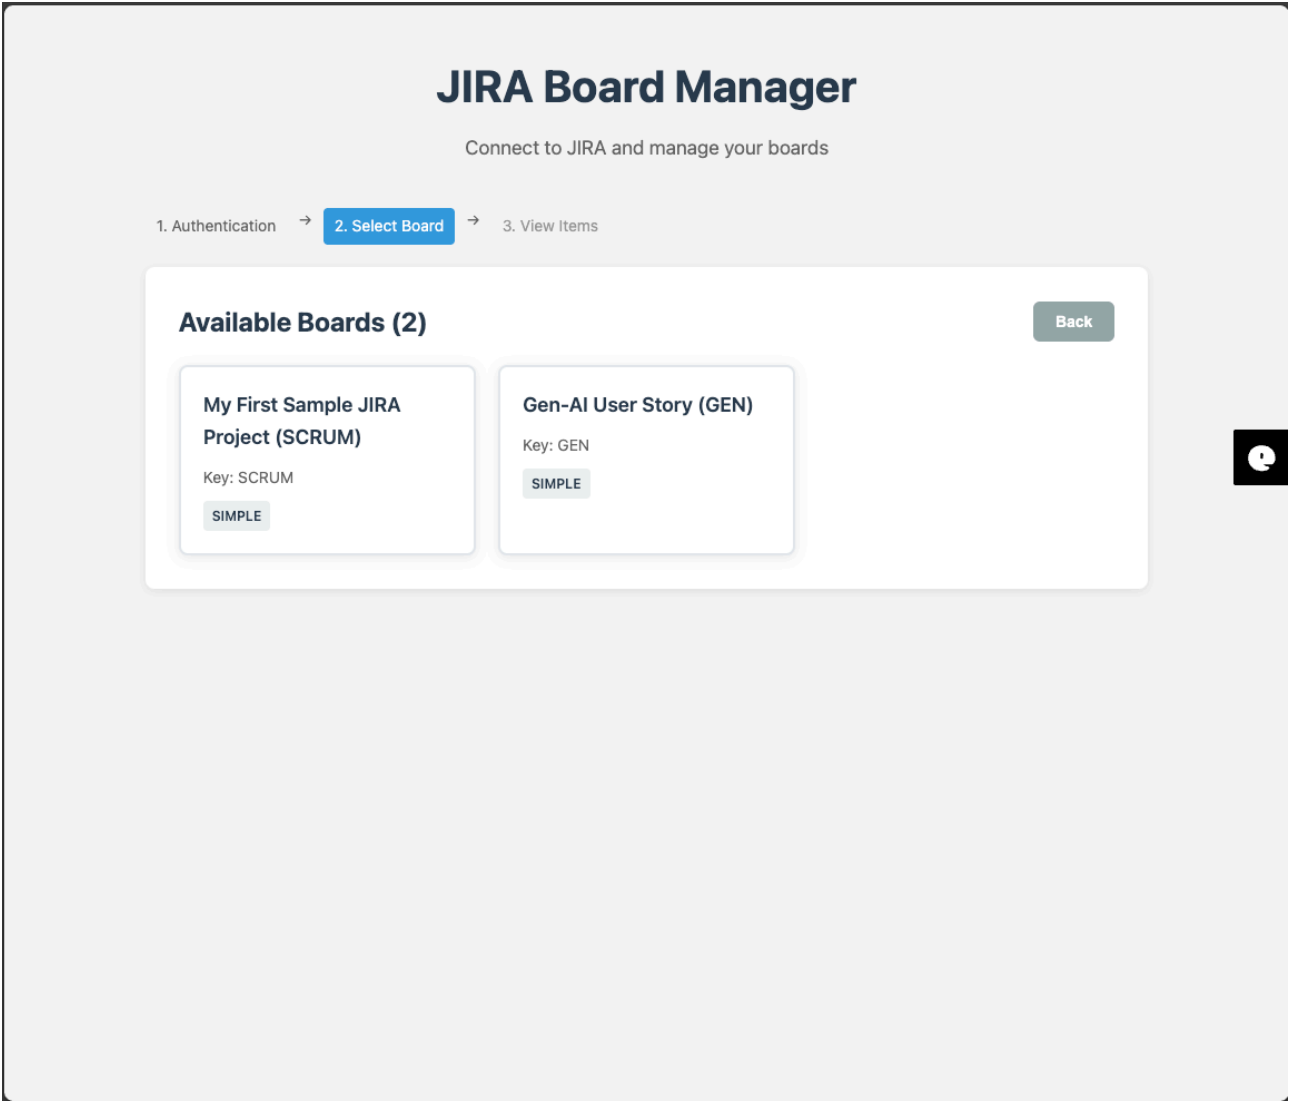

API Token *

.....

Your API token is sent securely to the backend and not stored.

Fetch Boards

2. Upon clicking the Fetch Boards button, the user gets a list of all available boards under his/her name

3. On clicking the board name, the user gets a list of all available user stories under the board

JIRA Board Manager

Connect to JIRA and manage your boards
